FAITH AND FINANCES WITH PHIL LENAHAN

Know Your Investments

A woman in her mid-fifties recently shared a story that, unfortunately, repeats itself far too often. She and her husband had built retirement savings over the years, but not to a level that would be sufficient to meet their future needs. As a result, her husband began searching for ways to accelerate the growth rate of the savings they did have. He attended investment networking meetings, where he met an investor who told him that with as little as \$50,000, he could double that money each year for the next five years, and build their retirement account into a significant amount of money. Apparently, the investor had developed a way to trade “futures and options” that was “the best thing since sliced bread.”

The husband entrusted over \$100,000 of their hard earned retirement savings to this investor. For a brief period of time, everything seemed to go well, with the investment growing by 25% in just four weeks. Then things began to unravel, until virtually their entire investment was wiped out.

Trying to accelerate one’s rate of return well above

sustainable levels is a recipe for disaster. Scripture warns us about the risks associated with trying to get rich quick. In Proverbs 13:11, we read, “Wealth hastily gotten will dwindle, but he who gathers little by little will increase it.” Growing sufficient wealth for your retirement years is a function of saving consistently and investing prudently over a long period of time. There aren’t any shortcuts. God love you.
